Background

Zoning History

The original zoning as adopted September 7, 1977 was Residential Multifamily High Density (RM-HD) District. The subject property was rezoned to Neighborhood Commercial District under case number 09-12MA.

Zoning District Summary

The RM-HD District is established to provide for high-density residential development in Richland County, allowing compact development consisting of the full spectrum of residential unit types where adequate public facilities are available. This district is intended to allow a mix of residential unit types to provide a balance of housing opportunities while maintaining neighborhood compatibility. This district may serve as a transitional district between lower density residential and low intensity commercial uses.

No minimum lot area requirement except as determined by DHEC. Maximum density standard: no more than sixteen (16) units per acre.

Based upon a gross density calculation, the maximum number of units for this site is approximately: 2 dwelling units.

Discussion

Parcel/Area Characteristics

The subject parcel is straddled by two roads located north and south of the parcel. It is internal to the existing Olympia neighborhood. The site is located at the intersection Bluff Road and Olympia Ave. The surrounding area is characterized by residential uses and zoning. North of the site is a student housing development. South and west of the subject parcel are residences. East of the site is undeveloped. The majority of Olympia Ave is zoned RM-HD.

Public Services

The subject parcel is within the boundaries of Richland School District One. Olympia Learning Center School is located 350 feet south of the subject parcel on Olympia Ave. Water and sewer is provided by the City of Columbia. There is a fire hydrant located west of the site along Olympia Ave. The Olympia fire station (station number 2) is located at 1015 Ferguson Street, approximately .12 miles north of the subject parcel.

Being within a service area is not a guarantee that services are available to the parcel.

Plans & Policies

The 2015 Richland County Comprehensive Plan, “PUTTING THE PIECES IN PLACE”, designates this area as Mixed Residential (High Density).

Land Use and Design

Areas include much of the urban and suburban developed areas in the County as well as edge areas adjacent to other jurisdictions in the County. These are densely developed urban and suburban areas, or opportunities for dense suburban development. Mixed residential areas include the full range of uses supportive of neighborhood, community, and regional commercial and employment needs. Residential single-family, multi-family, office and institutional, general and neighborhood commercial, and recreational uses are appropriate for this area. Some light industrial uses are also found today in these areas, but additional industrial development with significant community impacts (i.e., noise, exhaust, odor, heavy truck traffic) is discouraged, unless the area is identified specifically for these uses. Schools, churches, parks, and other institutional uses help support the full service nature of Mixed Residential areas.

Desired Development Pattern

Developments should reinforce the guiding principle of making neighborhoods and communities in Richland County more livable. Mixed Residential areas should provide a mix of housing opportunities within individual developments, preferably organized around a neighborhood center or public space. To the extent possible, commercial and office development should be located in Activity Centers and in Mixed Use Corridors. High density residential uses should be located proximate to or incorporated within Activity Centers, increasing existing and future opportunities for transit service to these locations. Grid and modified grid development patterns are preferred over curvilinear and cul-de-sac designs to support connectivity.

Traffic Characteristics

The 2022 SCDOT traffic count (Station #657) located south of the subject parcel on Olympia Ave. identifies 15,300 Average Daily Trips (ADT). Olympia Ave. is classified as a three lane divided principal arterial, maintained by SCDOT with a design capacity of 16,800 ADTs. This portion of Olympia Ave. is currently operating at Level of Service (LOS) “D”.

2
The ADTs are the total volume of traffic passing a point on a roadway during a 24-hour period. ADT data is collected by SCDOT.

There are no planned or programmed improvements for this road section through SCDOT or the County Penny Sales Tax program.

### Conclusion

Staff recommends **Approval** of this map amendment, as the proposed rezoning would be consistent with the objectives outlined in the Comprehensive Plan for the Mixed Residential (High Density) future land use designation.

The Plan recommends multi-family uses for this area.

For these reasons, staff recommends **Approval** of the map amendment.
